

Data collection sheet for custom-sized Arres 3.1 dummy modules

Custom-sized dummy modules are manufactured on a project-specific basis according to the customer's specifications. In most cases, production takes approximately 2 to 3 weeks from the order confirmation. This production time may vary depending on the current order situation and the size of the order. For this reason, please make sure you confirm the respective production time for your custom-sized dummy modules with your contact at Solarmarkt GmbH.

Minimal deviations of approx. +/- 2mm from the specified dimensions are possible due to production tolerances.

External dimensions of the original Arres 3.1 dummy modules

Module	Length	Height
Arres 3.1 dummy module Premium L	1748 mm	1188 mm
Arres 3.1 snow guard dummy module Premium L	1748 mm	460 mm

It is not possible to manufacture custom-sized dummy modules or snow guard dummy modules that are larger than the original dimensions of the Arres 3.1 dummy modules or the Arres 3.1 snow guard dummy modules.

Please complete the required external dimensions and the corresponding quantities in the table on the 2nd page and send the signed scan of the 2nd page to your contact at Solarmarkt GmbH.
